### **URBAN GREENUP**

# DEVELOPING KPI AND DATA COLLECTION PROGRAM FOR THE NBS IMPLEMENTATION AND MONITORING

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 730426

22ND FEBRUARY 2023

## **URBAN GREENUP**

# DEVELOPING KPI AND DATA COLLECTION PROGRAM FOR THE NBS IMPLEMENTATION AND MONITORING

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 730426

# **Table of Contents**

**KPI SELECTION PROCESS** 

**DATA COLLECTION PROCEDURES** 

# **OVERALL OBJECTIVE**

- Establish the monitoring and evaluation strategy
- Robust monitoring scheme
- Monitor performance
- ☐ Assess the impact against challenges

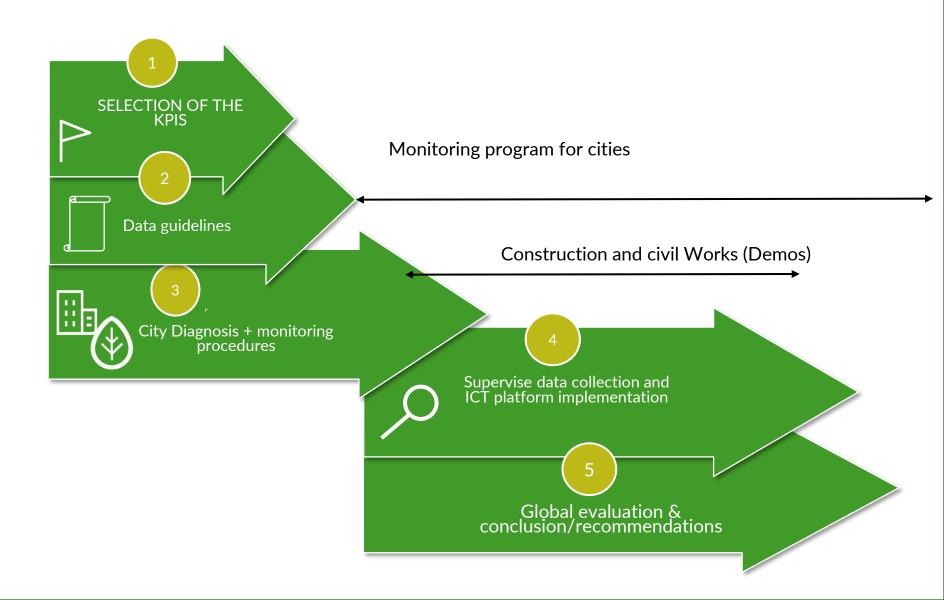

#### PROCESS AND TIMING

#### **GOALS**

- SUPPORT MUNICIPALITIES IN THE SELECTION AND TECHNICAL DEFINITION OF MONITORING KPI
- DEFINE SPECIFICATIONS FOR AN OPEN & INTEROPERABLE ICT TOOLS
- DEFINE A MONITORING SCHEME FOR EVIDENCE-BASED DIAGNOSIC AND TO SUPPORT NBS IMPLEMENTATION
- SUPERVISE DATA COLLECTION AND UPTAKE
- DERIVE CONCLUSION Y RECOMMENDATIONS

UNIVERSITY OF LIVERPOOL

We didn't start the fire

search...

Developing a mechanism for supporting better decisions on our environment based on the best available knowledge.

	СН	Nº	TYPE OF INDICATOR	KPI DEFINITION
	e 1	1	Environmental, Chemical	Tonnes of carbon removed or stored per unit area per unit time (ton CO2/Ha) (ton CO2/year). Total amount of carbon stored in vegetation (ton)
	Challenge	3	Environmental, Physical	Decrease in mean or peak daytime local temperatures (°C) Heatwave risks (number of combined tropical nights (>20 °C) and hot days (>35 °C)
	5	4	Others	Use of Star tools to calculate projected maximum surface temperature reduction (°C)
	2	5 6 7	Physical indicators	Run-off coefficient in relation to precipitation quantities (mm/%) Absorption capacity of green surfaces, bioretention structures and single trees (m3/m2) (m3/tree) Temperature reduction in urban areas (°C, % of energy reduction
	Challenge 2	8		for cooling) Areas (Ha) and population (inhab) exposed to flooding
	Cha	9 10	Chemical indicators (water quality)	Drinking water provision (m3 ha-1year-1) Water for irrigations purposes (m3 ha-1year-1)
CHALLE		11 12	Economic indicators (benefits)	Volume of water removed from water treatment system  Volume of water slowed down entering sewer system
CHALLE		13	Social indicators (benefits)	Accessibility (measured as distance or time) of urban green spaces for population (Tamosiunas et al., 2014).  Weighted recreation opportunities provided by Urban Green
CHALLE	<u> </u>		Environmental (biological)	Infrastructure (Derkzen et al. 2015) Production of food (ton/Ha/year) Increased connectivity to existing GI
CHALLE		17	Environmental (Stological)	Pollinator species increase (number)
CHALLE		18	Environmental (chemical)	Annual mean levels of fine particulate matter (e.g. PM2.5 and PM10) in cities (population weighted) concentration recorded ug/m3
CHALLE	len	20	Economic	Trends in emissions NOX, SOX  Monetary values: value of air pollution reduction; total monetary value of urban forests including air quality, run-off mitigation, energy savings, and increase in property values. use of GI val to calculate the value of air quality improvements
CHALLE		21 22	Social (physiological)	Number of deaths from air, water and soil pollution and contamination (proposed indicator for SDG target 3.9)  Air quality parameters NOx, VOC, PM etc
	Urban green indicators (environmental, biological)			Accessibility: distribution, configuration, and diversity of green space and land use changes (multi-scale ;) Green spaces quantity
		24 Socio-cultural indicators		Savings in energy use due to improved GI
	٦ '	25	Social	Perceptions of citizens on urban nature - Green spaces quality
	O 4 8	26	Social Cohesion	Green intelligence awareness.
	e agu	27	Psychological indicators (Relaxation and restoration, sense of place, exploratory behaviour, socializing).	Noise reduction rates applied to UGI within a defined road buffer dB(A) m-2 vegetation unit
	Challenge	28	Health indicators related to ecosystem service provision (Buffering of noise and air pollution, reduced heat, exposure to microflora).	Increase in walking and cycling in and around areas of interventions
	유 6	29	Economic	Number of jobs created; gross value added

CHALLENGE 4: GREEN SPACE MANAGEMENT				
TYPE OF INDICATOR	KPI DEFINITION	RELATED NBS		
Social indicators (benefits)	Accessibility of urban green spaces for population (measured as distance or time, Tamosiunas et al., 2014).	New green cycle lane and re-naturing existing bike lanes: Green cycle lane; Green resting areas; Cycle-pedestrian green paths. Vertical green interventions. Horizontal green interventions.  Urban farming promotion: Urban orchard; Community composting; Small-scale urban livestock. Educational activities: Educational paths (A, C); Urban farming educational activities  Tree related actions for Liverpool		
Measured method	KPI Unit	City		
Calculation of the shortest distance (linear) between the population in the NBS (line type), and the NBS location centroid. Results obtained in distance (m) and time (min). Tool: Geographic Information Systems.	(m) (min)	Valladolid Izmir		
Sensor	Calculi	External data source/ Website		
No sensor	Calculated with Geographic Information Systems (GIS)	Local Agenda 21 of Valladolid - Sustainability indicators.		
Measured method	KPI Unit	City		
GIS analysis of distance of NBS site from home, schools, and businesses. Land use cover will also be analysed in GIS to show what each area is comprised of, what different NBS are located within each site, and what socio-economic amenities can be identified. (links to recreation opportunities)	m2/km2	Liverpool		
Sensor	Calculi	External data source/ Website		
No Sensor	Calculated with Geographic Information Systems (GIS)	N/A		

CHALLENGE 4: GREEN SPACE MANAGEMENT				
TYPE OF INDICATOR	KPI DEFINITION	RELATED NBS		
Social indicators (benefits)	Accessibility of urban green spaces for population (measured as distance or time, Tamosiunas et al., 2014).	New green cycle lane and re-naturing existing bike lanes: Green cycle lane; Green resting areas; Cycle-pedestrian green paths. Vertical green interventions. Horizontal green interventions.  Urban farming promotion: Urban orchard; Community composting; Small-scale urban livestock. Educational activities: Educational paths (A, C); Urban farming educational activities  Tree related actions for Liverpool		
Measured method	KPI Unit	City		
Calculation of the shortest distance (linear) between the population in the NBS (line type), and the NBS location centroid. Results obtained in distance (m) and time (min). Tool: Geographic Information Systems.	(m) (min)	Valladolid Izmir		
Sensor	Calculi	External data source/ Website		
No sensor	Calculated with Geographic Information Systems (GIS)	Local Agenda 21 of Valladolid - Sustainability indicators.		
Measured method	KPI Unit	City		
GIS analysis of distance of NBS site from home, schools, and businesses. Land use cover will also be analysed in GIS to show what each area is comprised of, what different NBS are located within each site, and what socio-economic amenities can be identified. (links to recreation opportunities)	m2/km2	Liverpool		
Sensor	Calculi	External data source/ Website		
No Sensor	Calculated with Geographic Information Systems (GIS)	N/A		

CHALLENGE 4: GREEN SPACE MANAGEMENT				
TYPE OF INDICATOR	KPI DEFINITION	RELATED NBS		
Social indicators (benefits)	Accessibility of urban green spaces for population (measured as distance or time, Tamosiunas et al., 2014).	New green cycle lane and re-naturing existing bike lanes: Green cycle lane; Green resting areas; Cycle-pedestrian green paths. Vertical green interventions. Horizontal green interventions.  Urban farming promotion: Urban orchard; Community composting; Small-scale urban livestock. Educational activities: Educational paths (A, C); Urban farming educational activities  Tree related actions for Liverpool		
Measured method	KPI Unit	City		
Calculation of the shortest distance (linear) between the population in the NBS (line type), and the NBS location centroid. Results obtained in distance (m) and time (min). Tool: Geographic Information Systems.	(m) (min)	Valladolid Izmir		
Sensor	Calculi	External data source/ Website		
No sensor	Calculated with Geographic Information Systems (GIS)	Local Agenda 21 of Valladolid - Sustainability indicators.		
Measured method	KPI Unit	City
